Core Logo Elements

Core Elements

Logo Elements

The elements that combine to create the logo are essential to our brand's identity and should never be modified in any way shape or form. They should never be recreated or reinterpreted.

ELEMENT	NOTES
GAVILAN (SPARROWHAWK) 	The "Gavilan" image with the face and hat is the face of our brand. As an official logo element the face and hat are never separated or used individually. The new updated logo does not include any other body part or action i.e. cooking, hand waving, full body etc.
NAME 	Stating the brand name, the name graphic is never used separately from the Gavilan. The "Tacos" text is always placed in the crevice of the "G" and the "i" and is never allowed anywhere else. The only exceptions are our special case logos meant to address unique signage situations.
TAGLINE 	The "Ya está." is our slogan and is not necessary to always use it for our official logo, but should be used whenever possible. It's placement in relation to the logo has already been established in the logo proportions section of this manual.

Core Elements

Colors

Always use our set colors. If for any reason you must deviate from our colors express permission is required.

PANTONE® 485

RGB	218	41	28
HEX/HTML	DA291C

HEX/HTML	FFC72C		
CMYK	0	19	89 0

RICH BLACK

CMYK	60	40	40 100
------	----	----	--------

Logo Types & Uses

Logo Types and Uses

Case Logos

Our logo variations are designed to address real-world implementation needs while maintaining the integrity of our brand identity.

If for any reason these variations do not work on a specific implementation need, DO NOT MODIFY ANY OF OUR LOGOS WITHOUT OUR EXPRESS PERMISSION. Contact our Marketing department for a logo file that addresses that need.

NAME

USE

STANDARD LOGOS

The standard horizontal logo represents the full brand for any marketing purpose.

CONDENSED LOGOS

Used in cases where space is an issue and representation of the full brand is needed.

ICON LOGOS

The icon logo does not represent the full brand and is used only as an accent. Typically in items that are already inside our locations i.e. cups, decals, notices, uniforms etc.

SIGN LOGOS

These logos are prepared to address sign specific uses only. They are used whenever the standard or condensed logos cannot address the space properly. They are not meant to be used in any other context without our express permission.

Logo Types and Uses

Monotone Alternatives

Sometimes it may be necessary to use a logo with one or two colors. A special version of the gavilan has already been created to address this issue. If two colors are available see the color treatment section in this manual for acceptable variations
